EDUCATION

M.S., Marketing Analytics | *California State University, Long Beach*
B.A., Economics | *Tabriz University, Iran*

WORK EXPERIENCE

Social Media Marketing Intern (Performance Marketing)| *Filmadí (a film-industry networking startup), Remote* **Present**

- Set up a Meta iOS app-install campaign, including structure, audience targeting, budget, bidding, and A/B testing of 2 video creatives.
- Led cross-functional coordination for the campaign, aligning engineering, creative, and marketing teams on campaign requirements, launch dates, deadlines, and deliverables.
- Collaborated with the creative team, suggested innovative ad ideas, and quality-checked creative assets for brand consistency.
- Partnered with engineering to troubleshoot and verify iOS install tracking (SKAdNetwork and Meta SDK) before launch.
- Monitored daily campaign performance and KPIs; identified under-delivery on both ads and broadened the target audience from ~2M to 23–28M, improving spend pacing.
- Identified that one of two test videos barely delivered even after the audience was broadened, while the other earned a 30% hook rate and 22 link clicks from 1,450 people reached; planned a low-budget, click-optimized retest to find the cause before scaling spend.
- Tracked app-install attribution in Meta Events Manager and diagnosed an attribution gap: Meta credited only 1 install, but total installs rose to 25 during the campaign week (2.5x the prior 3-week average of 10). Recommended a post-install attribution survey to isolate paid-campaign impact.
- Analyzed click-to-install conversion gaps; suggested actionable solutions such as early brand placement in video hooks, an onboarding friction audit and landing page update, and recruiter partnerships to strengthen the value proposition and improve conversion rates.
- Compiled an executive report and dashboards summarizing campaign results and recommendations for cross-functional teams
- Documented campaign setup processes and helped onboard teammates on ad tools and workflows.
- Built a social listening study of 1,200+ public comments and competitor app reviews, using NLP sentiment (RoBERTa) and topic classification (BART-MNLI) validated against review ratings and a 100-comment human audit, to pinpoint competitor pain points.

Marketing Assistant, Weekend MBA | *California State University, Long Beach, CA* **February 2026 – August 2026**

- Launched Instagram and LinkedIn from scratch and ran 3 full-funnel organic campaigns per platform, scheduling posts around data-driven best times to post.
- Set up Linktree, lead-generation forms, and UTMs to track traffic sources, conversions, and user behavior.
- Created and implemented a comprehensive 12-month marketing plan and monthly marketing calendar, tracking important events and deadlines so every launch went out on time.
- Planned and scheduled 6 content batches and produced the July–August batch, including 40+ scripts, short-form videos, and carousels.
- Maintained project timelines, status reports, and the photo, video, and logo library in Microsoft 365 and Google Workspace
- Designed 5 email marketing series, including newsletters, in Mailchimp to move a niche audience from awareness to conversion.
- Compiled weekly campaign performance reports for the marketing director, identifying top-performing formats (8.0% CTR).

Co-Founder, Marketing and Operations | *Cakebyshayeste, Istanbul, Turkey* **November 2019 – March 2024**

- Managed a family consumer brand for 4 years, handling online sales, product photography, and publishing 400+ social media posts.
- Grew monthly revenue by $2,000 through partnerships with 2 event-planning firms and influencers.
- Led customer communications across digital and direct channels, strengthening customer relationships.

Graphic Designer | *Freelance, Tabriz, Iran* **August 2023 – March 2024**

- Designed logos, social graphics, and promotional materials for brands, applying creative problem-solving and divergent thinking to develop unique visual identities using Adobe Illustrator.

Certifications: Google Skillshop (Search Ads, Display Ads, Video Ads, Measurement, Creative Strategy); British Airways Data Analytics (Forage); Excel Statistics Essential Training (LinkedIn Learning)
Languages: English, Persian, Turkish, Azeri

PROJECTS

Owala Brand Strategy & Retention | *Graduate Project*

- Analyzed social listening, search and audience data to identify why a durable-product brand struggled to drive repeat purchases.
- Developed subscription product line and bundle-and-habit DTC model, targeting a lifetime value increase from $38 to $350+.
- Planned a phased rollout with creator partnerships and a UGC campaign, measured by reorder rate and a 4x ROAS target.
